DETAILED ACTION

1. This action is in response to the amendment filed 12/12/2005.
2. Claims 1-18 have been examined and allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The cited prior art does not teach or render obvious the invention as recited in independent claims 1, 6, 11, 14 and 17. More specifically, the cited prior art does not teach a character string data processing system for passing a first character string from a first object through an interface object to a second object in which the first character string declared as a first data type as a basic string data type, whereby the number of characters including null data in the first character string is countable irrespective of the declared type of the first character string, detecting an effective number of characters in the first character string by analyzing its basic string data type representation, and converting the effective number of characters in the first character string to a second character string that can be passed by the operating system to the second object, without using binary conversion to convert the first character string to a special format; and processing, in the second object, the second character string, which is declared as the first data type, as a basic string data type, irrespective of the declared type of the second character string, when taken in the context as a whole.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
